WOOSUNG INNER BAR -

PRECAUTIONS TO BE TAKEN TO PREVENT COLL SIONS AND OB-STRUCTION OF THE CHANNEL.

IN view of the fact that the difficulties and dangers of Navigation at the WOOSUNG INNER BAR have been very greatly increased by the non-observance of rules intended to facilitate traffic and prevent accidents that were published in Notices to Mariners Nos. 23 and 46 (Special), issued respectively on the 14th Sanitary Board, January, 1893 and the 29th November, 1894. such portions of the same as are applicable at the present time are repeated below, as a reminder to all concerned.

"A very careful look-out should be kept by all vestels approaching the Bar, and those baying the tide against them should wait for those going with the tide to pass first; also a wessel overtaking another should revulate her speed so as to allow the one shead to get clear of the Bar first."

The look out enjoined by the above Rule should begin at or outside the WOOSUNG SPIT Buoy on beard of inward bound vessels, and at or above the upper and of GOUGH INLAND OR board of outward bound ones.

Captains and Pilots are notified not to attempt to cross the Bar when the signals at the Woo ung Station indicate less water than the vessel is drawing, noless they have previously obtained information as provided for in the subjoined note."

As the prosperity of the shipping trade of Shinghai depends greatly upon the conscientions observance of the two Rules above quoted, it is argenily requested that every possible means shall be taken by those interested to see that they are carried out.

NOTE.

"As it is sometimes the case that a greater depth than is signalled can be obtained by fedlowing a trank which cannot be indicated by the Bar Marks, Captains, and Pilots wishing for further information than that ab we by the signals should app y at the Harbous Master's Ciprica at Shanghai or to the BERTHING OFFICER at Woosney shortly before the occasion on which they may wish to make use of such

"The man was source cold before he and wife were carried on men's shoulders; sh sitting by him, and having provided herself with some cowries, she distributed them among the populace, together with rice, fried in butter and sugar, very plentifully, as she passed from her house to the place of burning, where when she arrived, they had not began to make the pile. She was therefore set down together with her dead husband, and gave several orders to the people in making her pile, and was so far from being in the least afraid that she rejoiced much. I went up to her, and asked her if it was her own free will and consent; she told me it was, and that she was much obliged to me for giving her liberty to barn in that place and desired I would not offer to oppose it, as she would certainly make away with herself if she were prevented. She sat talking with her friends and neighbours till the pile was ready, which was above an hour, and then went a little distance off, whither the decessed was also carried, and both, being washed with water from the Ganges, had clean clothes put upon them, The son of the deceased then put a painted crown or cap on his father's head, of the same kind as is usual for them to wear at their marriages. and a Brahmin woman brought four lamps baruing and put one of them into the woman's hand, and placed the other three round her upon the ground. CANNED HORSE. We take the following from the Weskla

Mr. L. Zimmerman, manager of the Pacific Panking Company, of Tacoms, who is now in

this city, is not at all sanguine of the success of slaughtering horses for profit. He knows something about the business, for he has been making a study of it for more than two years past, and so is prepared to speak to the point. " I would not for a moment think of throwing

cold water on the project just started here," he said, "for I believe that it is absolutely necessary for as in some way to get rid of thousands of valueless horses that are cleaning of our ranges where cattle might be fattened at a profit, which would result in the upbuilding of wealthy communities. With some gentlemen on the Sound and in this city, who are interested with me in other enterprises, I entered upon a systematic investigation of this subject nearly two years ago, and after the expenditure of a considerable sum of money, and a waste of much valuable time, we came to the e nclusion that there was no profit in the business. "We first exp "un at d with slaughtering a fow horses, canning and drying the meat, tan-
